# 2017 – 2022

– '17 and '18 are styled [and/or 'themed'] very colorfully, the rest much less so ……..

----------13 'tones' [day colours], added to accord with the 'dreamspell' dispensation' divined and practiced for 20 years with intimates by a Mexerican [later 'nicked' Volum Votan], then launched for free in the early 90s (newer browsers prolly don't show them). See the JA collection at this adress. i fixed the first one but the rest here has 14 hues .. 'abusiefelijk'. Never mind:

longer intro [about the last editing push august 2022] and again: hilite color shift per day, but this time, consistent with my assigments [basically rainbow with bl wh and gr added, see earlier work] to 'wizpensation tones' [day qualities as one can see on the JA file ... page ....]

# = if anything is solid proof of the malice inflicted on me, it is this:

on my doorstep, a few years before the poisoncreepery, a weed grew huge on my doorstep and was brutalized by the 'tokkie perps' ... I had a giant one by my backdoor as well, growing from between fairly tightly fitting 'cobbles' ……. as it turns out, 3 years later I learn the nature and effect of this plant via a 'gutmix herbal tea which contains a variety of it. This alsem happens to be the basis for the king bitters absinthe and relieves any discomfort I have in my kidneys almost instantly everytime.
